

Seeking Soil Selfies for the International Year of Soils and Global Soils Week 2015

Jeanie wants your 'Soil Selfies'

Warracknabeal environmental educator Jeanie Clark (below) has hit on a new way to get people to focus on soil.

Instead of taking 'selfies' of people, she's calling on keen photographers to instead snap some soil selfies.

"Soil Selfies is a grass-roots project aimed at Celebrating 2015 as the International Year of Soil," Mrs Clark said.

"The images will be used to create an on-line educational resource about how people see and use their soils."

From this concept, Mrs Clark has been invited to create a display at the Global Soils Week international soils forum in Berlin in mid-April.

"These images will form one of 12 visual displays as part of the collaborative and participatory processes at the Berlin forum.

"These 'Soil Selfies' will provide participants with a 'voice' into high level global discussions on issues including soil challenges and management.

"It is so easy all you have to do is take a photo showing soil detail and illustrating how the soil is used and any challenges or management methods," she said.

"I will also need comments to support this, including a weblink if you have it."

Full details and examples of what is needed are at <http://soils.enviroed4all.com.au/soil-selfies/>

"So please reward your soil with a photo submission to my Soil Selfies website this month! Help create a great on-line resource about soils, and images that will show-case your soil and region on display for the soil science world at Berlin in April."
